

The listings in sending me to identify personnel on the two photos both are from 369th. hope this helps some.

To change the subject: I would like to put my two cents in about "Mr" the dog and his master were bunk bed partners of mine until I was shot down. it was sure true about him. if Sgt. Peers went around I couldn't get anywhere near my bunk. no one else could either. I have a couple of snap shots of Mister and will try to get some copies made if you would like them. #

I don't suppose in writing to the right people. I would like to obtain copies of my flight record but have tried for 50 yrs without any luck. can you help?

hope you can decipher this
