

HEADQUARTERS 306TH BOMBARDMENT GROUP (H)  
Office Of The Intelligence Officer  
United States Forces

13 June, 1943

SUBJECT: Intelligence Report

TO : Commanding Officer, 306 Bombardment Group (H)

1. Hot News:

One B-17, felt to be #218, Marcotte, went down under control, over target at 0953, undoubtedly hit by flak. Went down circling, up to 8 chutes reported.

1 B-17 about 20 miles off Islands is reported to have turned back toward Germany at 1030 hours.

1 B-17 over target from group behind was seen in a long glide, 2 chutes.

A total of four B-17's were reported in trouble over target but one of these may have been Kooima who got back to England.

2 life boats in North Sea, at 54° 20' North, 7° 10' East by our Ship 084 (Husband) at 18,000 feet at 0900 hours on way in.

2. Narrative:

28 A/C took off at 6:40 to bomb the submarine building works at Bremen. The route was as ordered. Weather was clear, a front seeming to obscure the Kiel area. There were no abortions. 28 A/C were over the target and it is felt that all bombed. Marcotte is missing, and was last seen in trouble over the target area. He was probably hit by flak, and up to 8 chutes are reported. Kooima landed in England at Mepa. The other 26 A/C landed safely at base at 1315 hours.

3. Bombing:

Crews report a good run of from 30 to 50 seconds duration. They could see the target in spite of an effective smoke screen. Intense flak immediately after bombs were away interfered with a clear view of the results.

4. Encounters:

Practically no enemy A/C were encountered, Crews reporting not seeing more than from three to six on the entire trip. We claim only one destroyed, knocked down over water on way home by Belser's Crew. The diversion was undoubtedly successful in flushing E/A in area.

5. Flak:

Flak was very intense and accurate immediately over target. The lead ships seem to have been located by continuous following, after which an intense barrage was thrown up. Ships were in flak not more than two minutes.

6. Missing and Wounded:

One A/C is missing, Marcotte.

Capt. Patten was along as a gunner. 8 men reported to hospital wounded, one very seriously, 2 serious, balance slight.

7. Three A/C, all in lead group, #167, #900, #557 seriously damaged. Most other ships have some flak damage.

8. Observations:

There was an effective smoke screen at Emden, Wilhelmshaven, and Bremen. Smoke screens were probably started when 4th Wing was first sighted, thus having been in operation for some time when our Group appeared. A "Rocket Gun" was reported firing behind. Showed flash and trail like big tracer then burst like big flak. Dickinson, Tail Gunner on Kelly's ship, continued firing his guns after being very seriously wounded.

Major, AC.,  
Group S-2 .

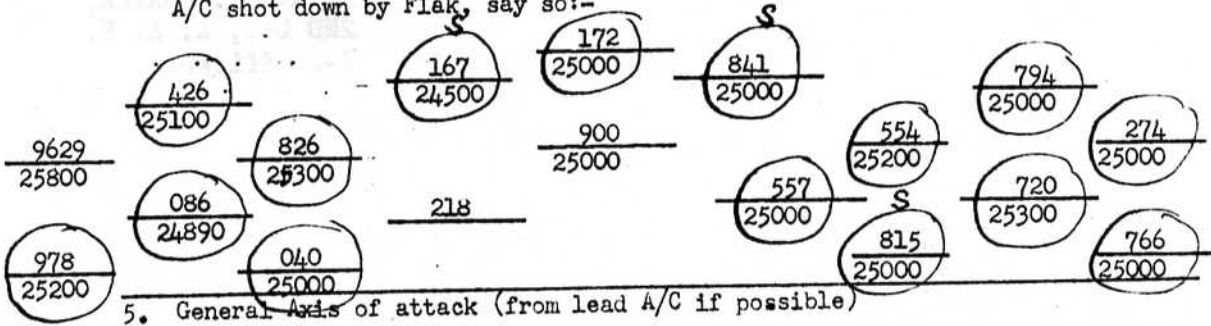

Target BREMEN

1. Route followed. Baltrum Island to Leer to Wildershausen, to Target to Bemevorde to Spieka — Home.

2. Visibility at Target (Any condensation trails?)  
 Good visibility over target despite scattered clouds and some haze,  
 no condensation trails.

3. No. of A/C over Target. 28

4. #218 Bomed target but did not return to Base. Those A/C damaged by  
 Formation over target, with height of each A/C. Those A/C damaged by  
 Flak to be circled, and if seriously damaged, insert small "S". If any  
 A/C shot down by Flak, say so:-

5. General Axis of attack (from lead A/C if possible)  
 60° Mag.

6. How long did formation fly straight and level before bombing?  
 30 seconds

7. Turn after bombing. Slight turn to left and then right—A lazy "S".

8. Position of Group in relation to other Groups. Lead Group

9. What evasive action was taken? Sharp turns similar to broken field running.

10. A short description of Flak en route (if any) and at the Target, including if possible a suggestion as to type of fire control employed - i.e., Continuous following predicted concentrations, predicted barrages, or fixed barrages. Target: - Heavy AA fire, intense, accurate, mostly black but some white came in bursts of three, six and twelve stepped up. Very intense covering a 5 mile area. Fire control was continuous following and heavy predicted concentrations. There is a possibility of predicted barrages. A.A. fire covered the entire area some as high as 35,000 feet. A.A. fire was also coming from the residential section. Some light A.A. fire seen way below -- orange bursts.

Baltrum -- very meager -- 3 or 4 bursts.  
 Worpsswede -- very meager.  
 Bremenshaven -- meager, could not reach us because of distance.  
 One high burst at coast near Baltrum, mile to rear but level, origin unknown.

11. Any other Comments, Phenomena, etc.  
 1.- Smoke screens at target, Emden and Wilhelmshaven especially good.  
 2.- "Rocket" firing away behind, flash and trail like big tracer until burst like large A.A. shell.  
 3.- A.A. fire so accurate, boys believe St. Nazaire gunners may have been moved to Bremen

HENRY J. SCHMIDT,  
Major, Air Corps,  
Materiel Officer.

- A. Shows at least 50 bomb bursts in the dock area between BASIN I and the Weser River South of the basin. This includes at least 2 direct hits on the lateral slips at the Atlas Werke Shipyard, numerous hits on industrial buildings nearby, at least 10 bomb bursts on and beside warehouses along the quay and 5 direct hits on the light railways serving this area.
- B. Shows approx. 35 bomb bursts on the quays and area immediately North East of BASIN I including at least 8 hits on or near warehouses along the dockside. The sidings North of these warehouses appear to have been hit in at least 6 places while the Engine sheds also appear to have been directly hit. Several bombs have fallen on the Jute Spinning Mills further to the North East while the remainder of the bomb bursts seen here are in residential areas.
- C. Smoke from about 10 bombs which have fallen among houses in the Woltmeshausen district South East of the Weser River.
- D. Shows smoke from approx. 45 bomb bursts from bombs which have mostly fallen among houses in the Neustadt district. It also includes at least 2 hits on railway sidings, South of Hohentors Hafen, one, probably two, bomb bursts beside the Infantry Barracks and several on the camouflage over the Kleine Z Weser.
- E. The 10 bomb bursts seen at C in Print I with a further 40 bursts in residential areas. The early stages of the smoke screen developing from ejectors along roads South West of the port are also well seen on this print.
